

KITCHEN DESIGNS
BY  **AGT**

PREFACE

AGT is a brand that brings wood together with technology and leads the sector with its innovative perspective by closely following all world trends.

Defining your style is much easier with AGT.

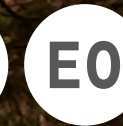

In this catalog, you will find different color and surface options designed with AGT panels, as well as kitchen alternatives combined with AGT profiles in the same space.

All of the products in this catalog are manufactured and designed by AGT.

SENSITIVE TO NATURE PRODUCTS THAT RESPECT THE FUTURE

At AGT, we know the value of what nature offers us, and we prioritize our concern for a sustainable life and a green future above all else. For this, we think about tomorrow today with our environmentally friendly products.

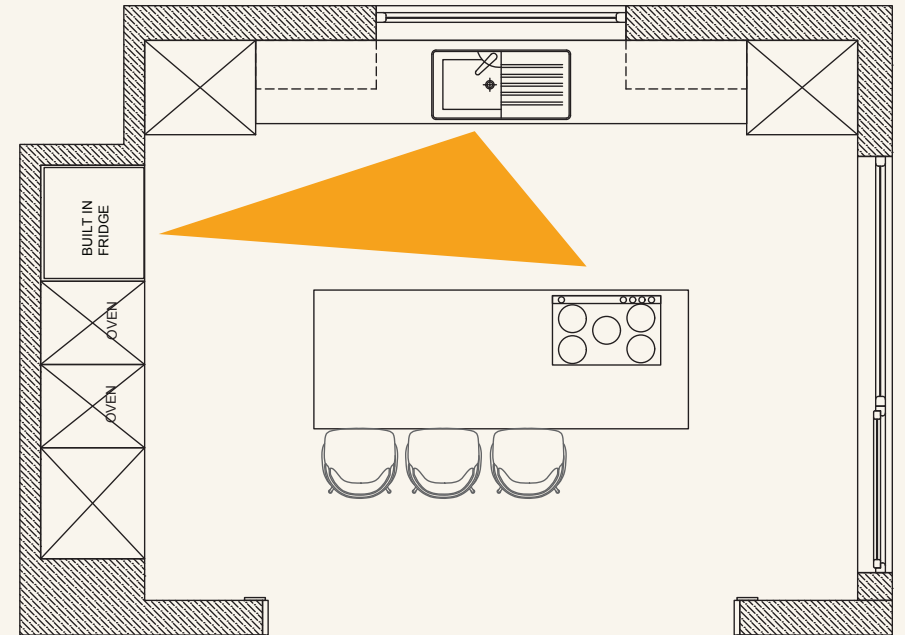

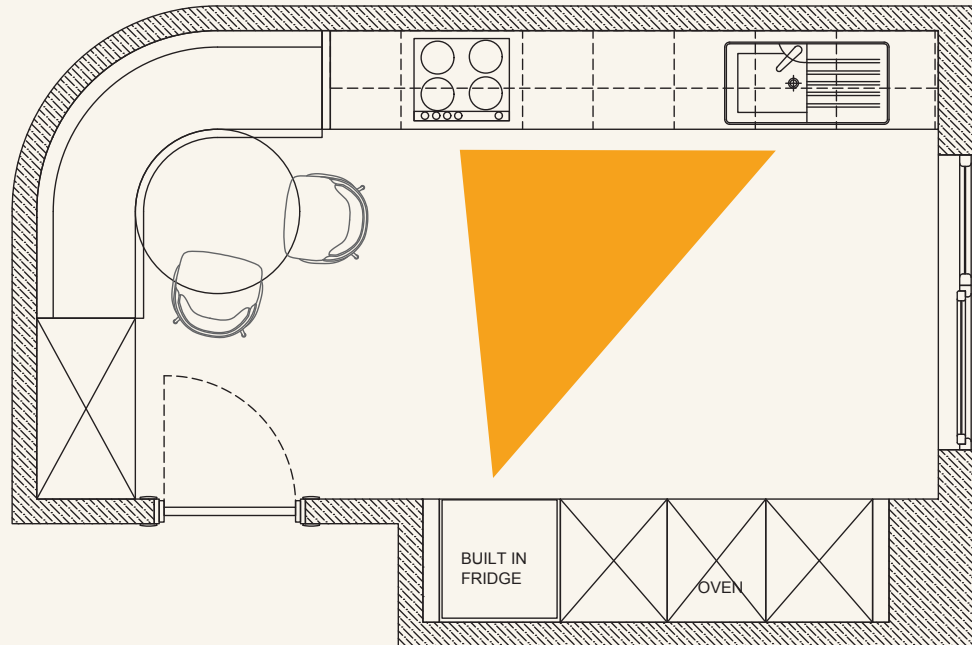

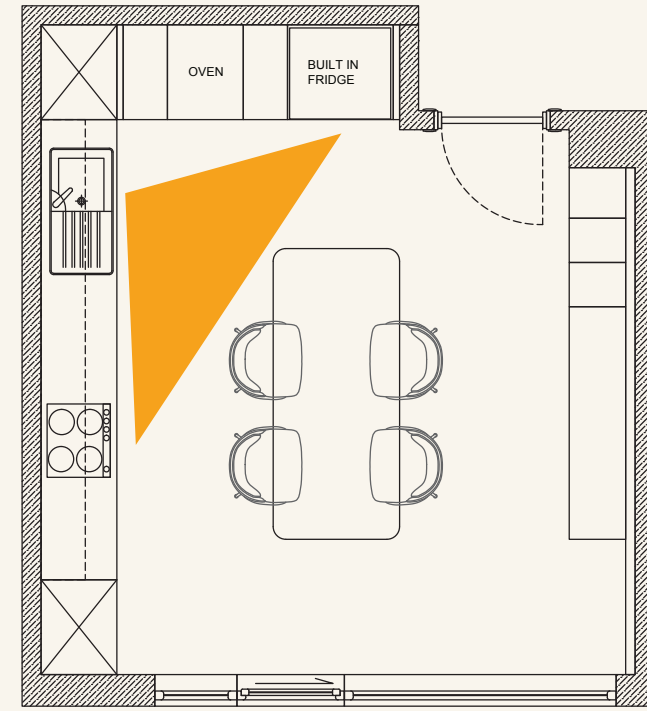

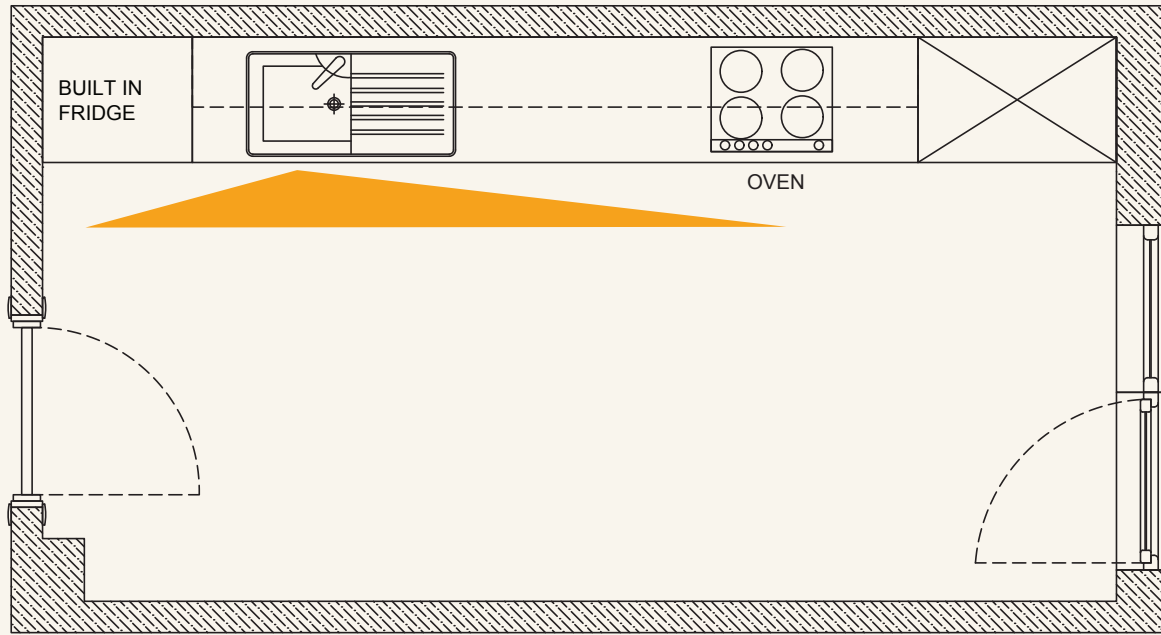

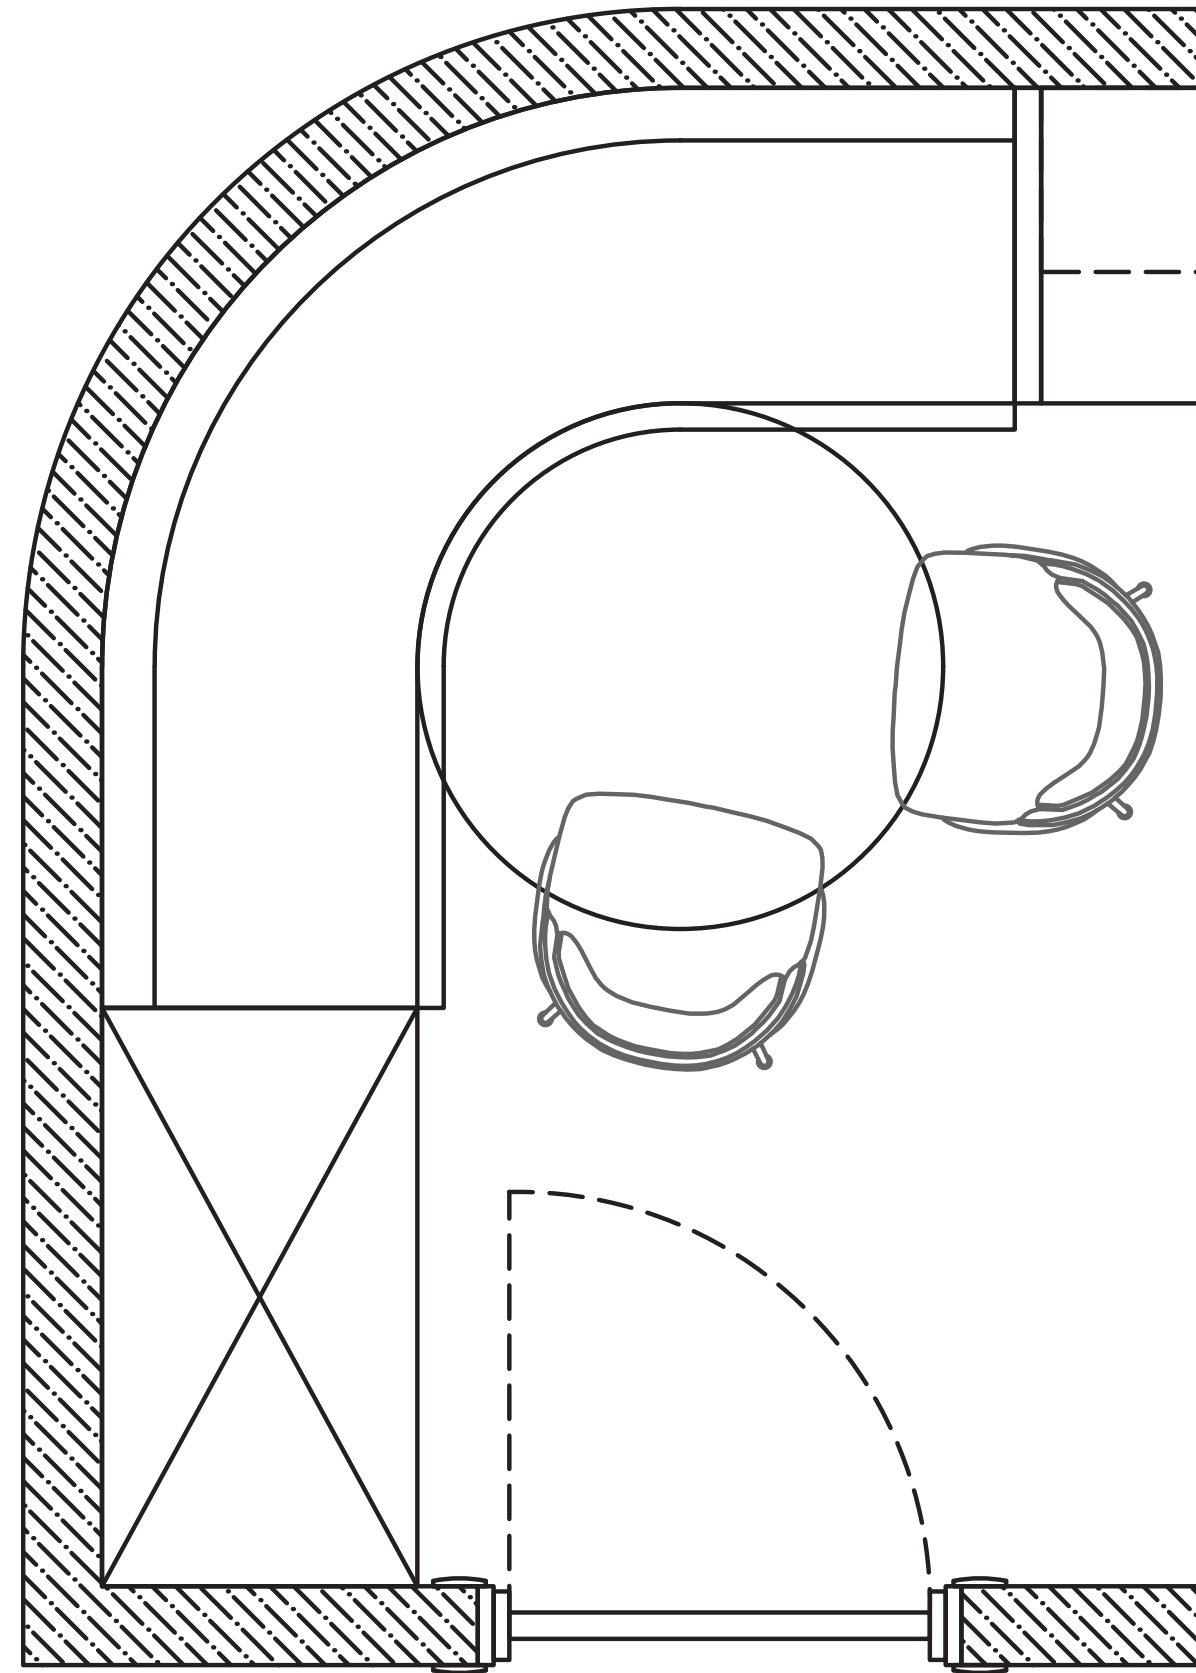

YOUR DREAM KITCHENS

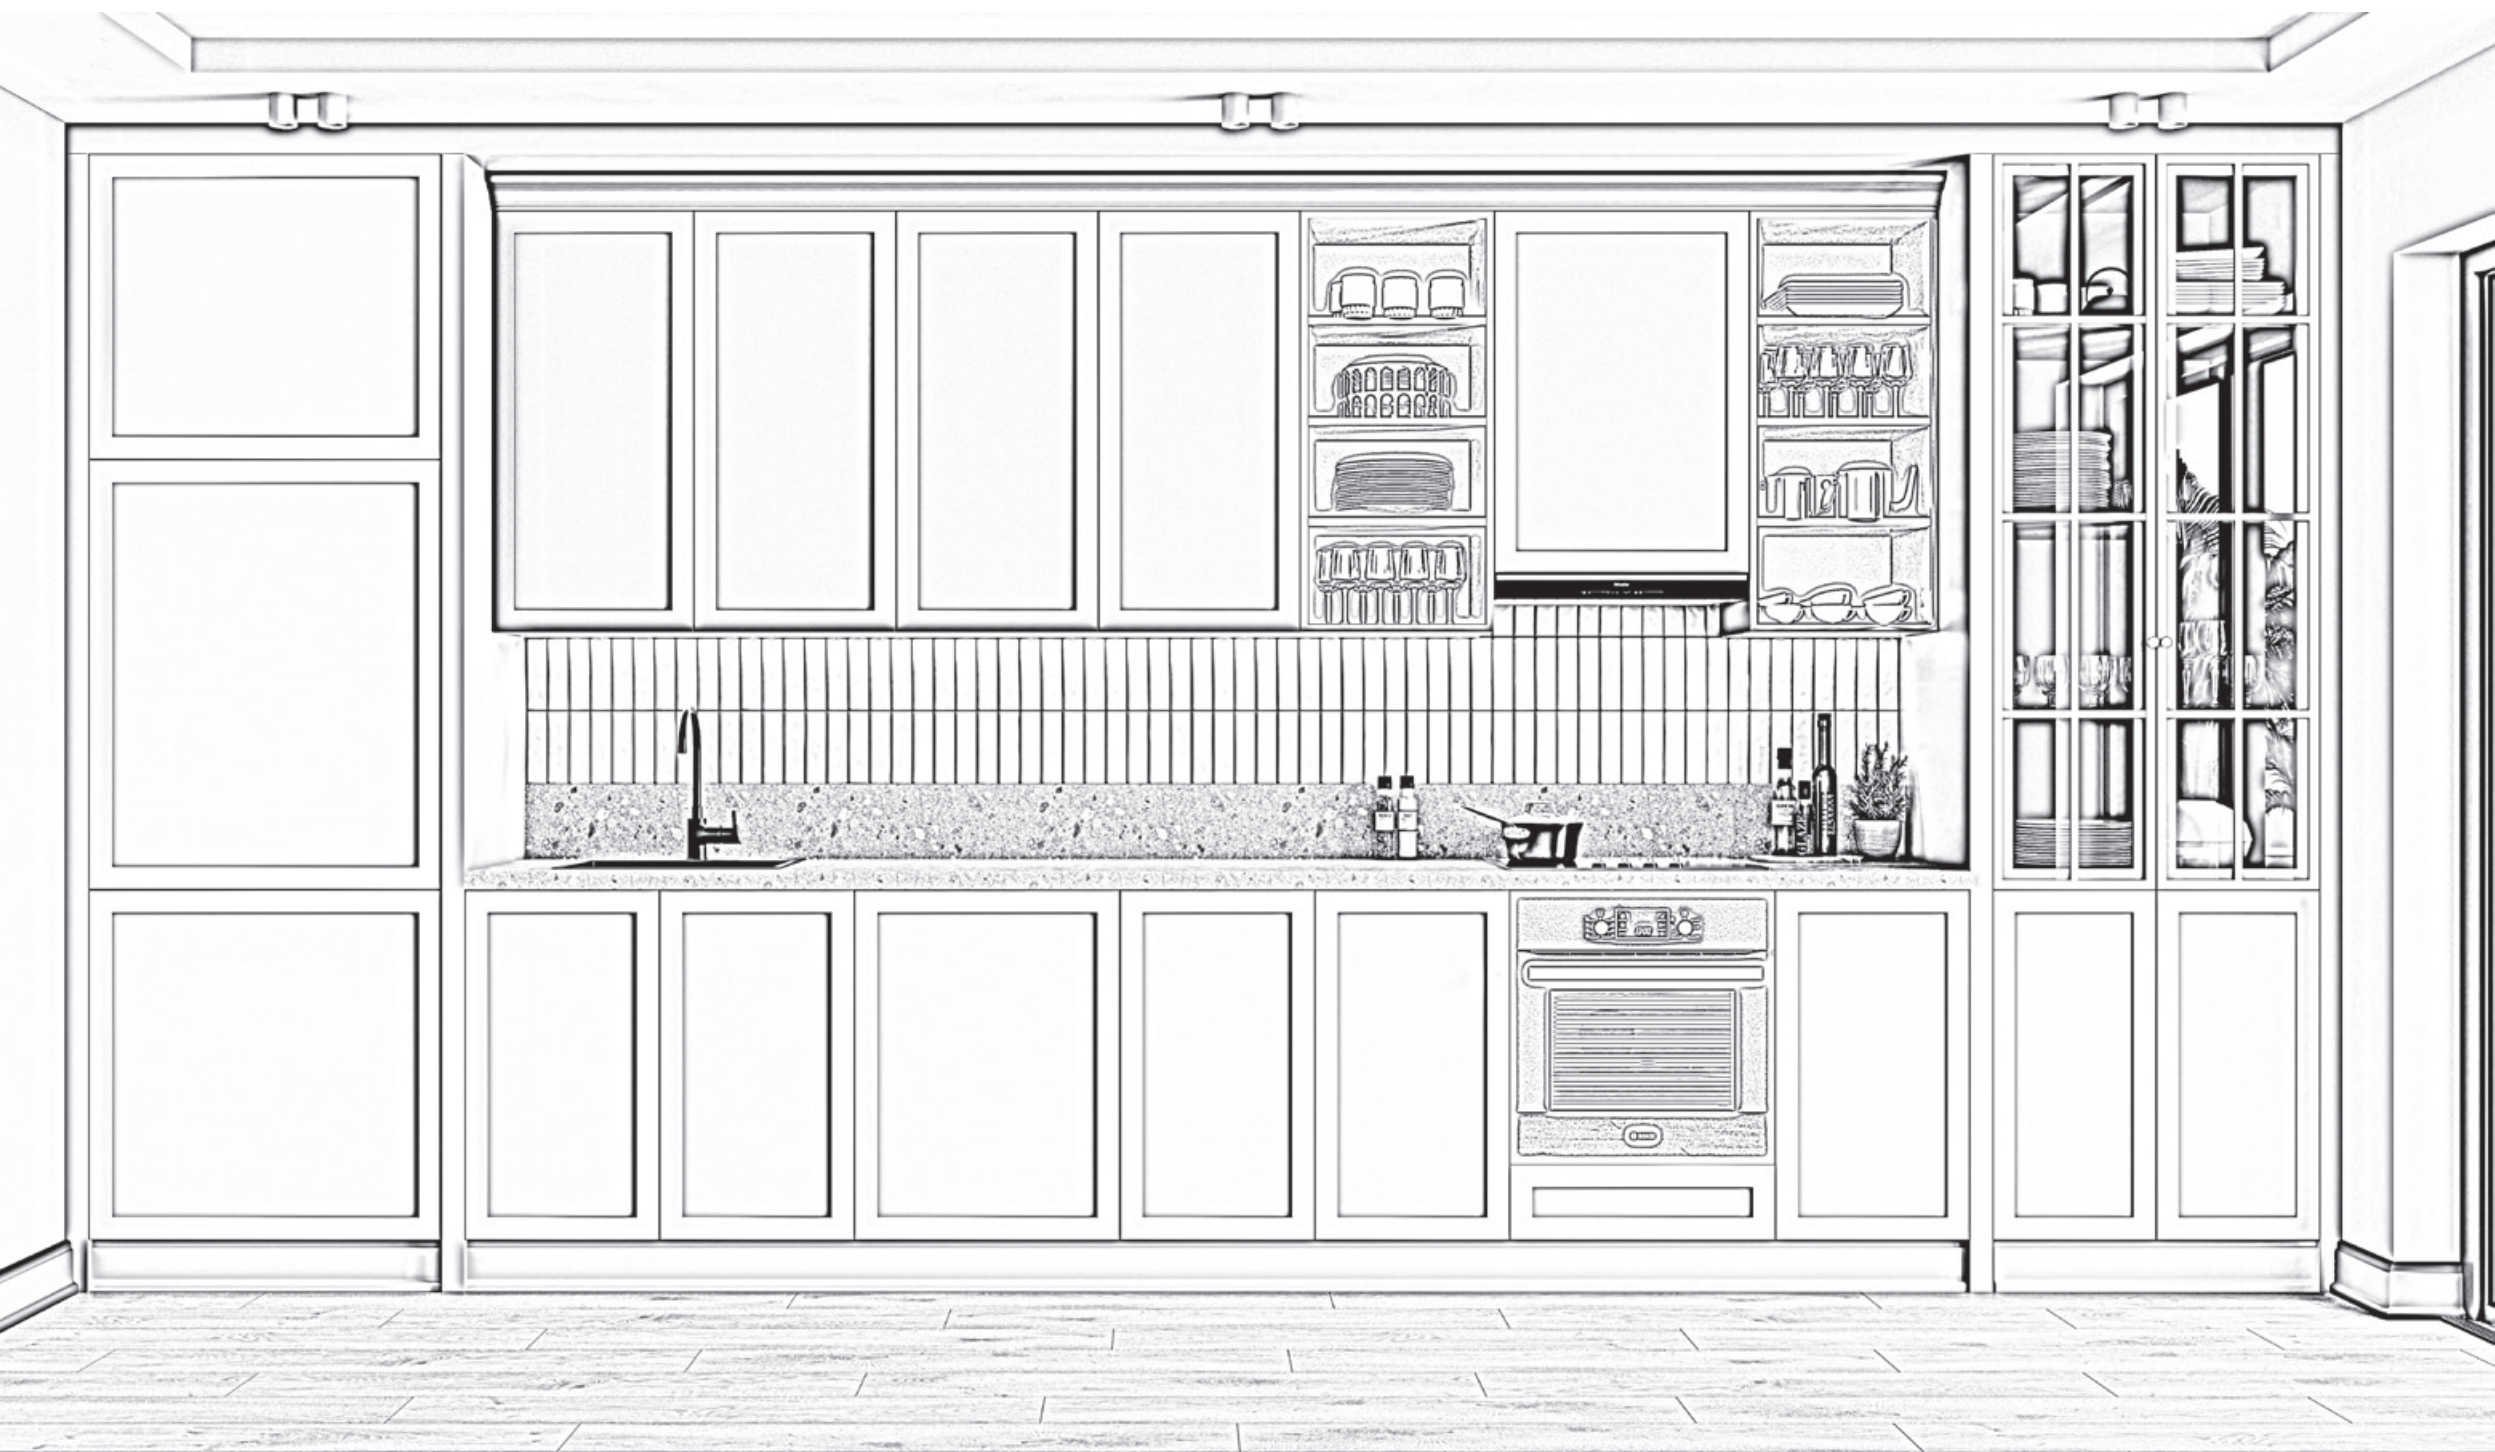

Kitchens are the place where we spend the most time at home, not only for cooking, but also for pleasant meals and family gatherings. For this reason, most of us always think of large areas. However, rather than the width of the space, it is important to be able to use the kitchen ergonomically and to combine this ergonomics with colors and textures that you can use for a long time without getting bored.

In kitchen designs, besides the color and texture of the doors, functionality is very important.

For those who use the kitchen, it is useful to adhere to the kitchen work triangle so that they can do much more work in less time. The kitchen work triangle allows a person who wants to cook to reach the sink first for the washing process, after taking the ingredients from the refrigerator, and after completing the preparation stages, the area used for cooking is at shorter distances.

CLASSIC KITCHEN DESIGNS

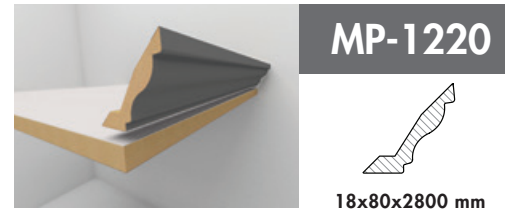

One-Wall Kitchen 1

The perfect combination of AGT profiles and the green tones in the Supramat collection!

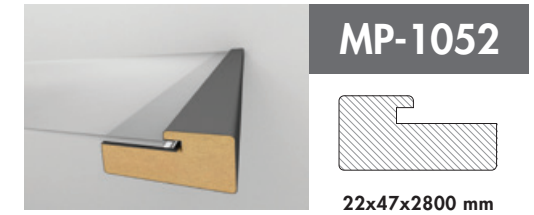

Instead of different color combinations in your kitchens, we can achieve simple designs by capturing tone-on-tone harmonies with different shades of the same color.

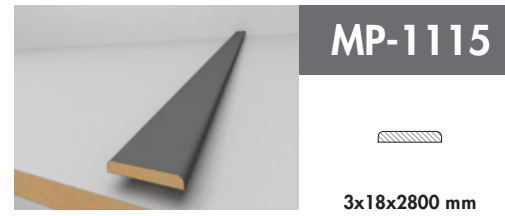

Multi Purpose Profile

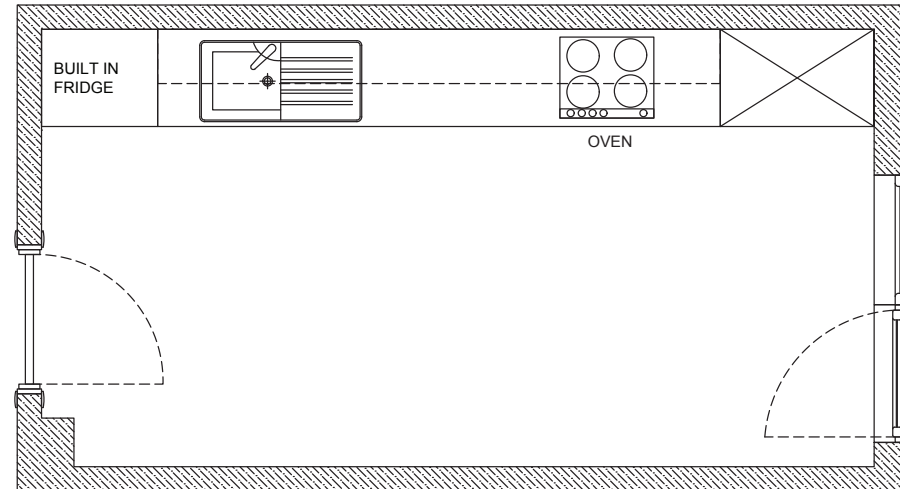

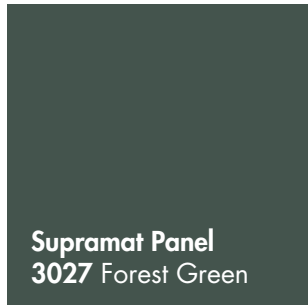

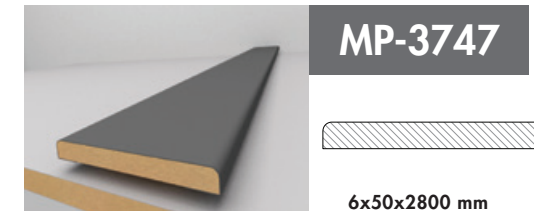

4 mm Glass Profile

Multi Purpose Profile

8 mm Cabinet Door Profile

-  Lacquer Surface
-  Repairable Micro Scratches

In small spaces, especially in places where the living room and kitchen are one, you cannot think of the kitchen design very differently from the living room concept. If you make a difference with color and tonal transitions between textures, your space will appear larger than it is.

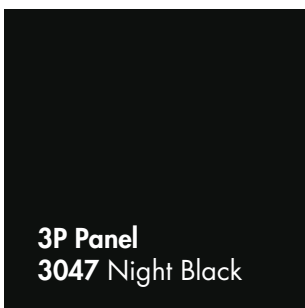

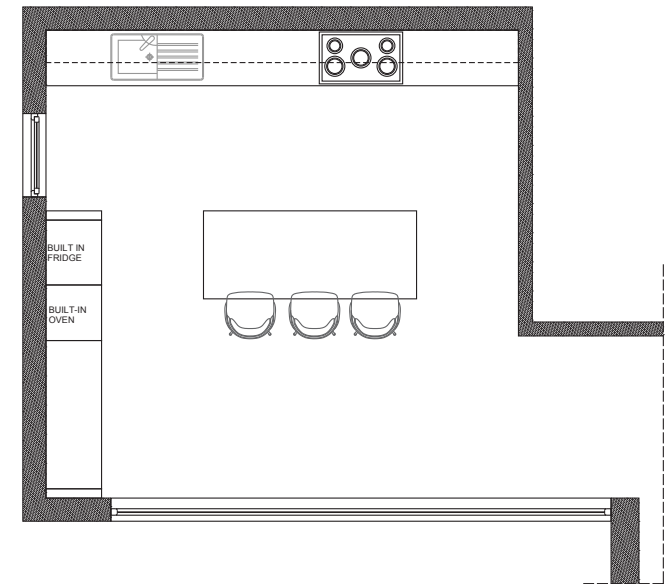

Island Kitchen 3

If you have a kitchen with a large window that invites daylight in all day, do not avoid using dark colors. Contouring the black color with gray tones in the modern island kitchen will add a different elegant atmosphere to your kitchen.
